**Process Redesign for Health Care Using Lean Thinking** Sometimes a system can keep pace by making incremental changes and improvements; however, sometimes the changes needed can be major enough that a full system redesign is the best option. Southcentral Foundation's system redesign has greatly improved quality of care, and SCF has sustained these improvements for almost two decades. Following are three tips for system redesign that SCF used to support the system transformation that established the Nuka System of Care:

**Three Tips for Health Care System Redesign** Health care/system redesign involves making systematic changes to primary care practices and health systems to improve the quality, efficiency, and effectiveness of patient care. Frameworks, models, and concepts such as the Chronic Care Model and the Patient-Centered Medical Home (PCMH) can be used independently or together to reorganize care delivery for the purpose of improving patient outcomes.
