Psion made them in several sizes: 8, 16, 32, 64, and 128k. Some other companies made larger ones. Note that the CM model organiser cannot use packs larger than 64k. Datapacks of 8 and 16K were first produced for the Series One Organiser. The Series II uses essentially the same design and so those old packs can be used with it. Larger packs have a different internal addressing mechanism and ...

~~Psion Organiser II XP Developer with manual and ...~~

1 x Psion Organiser II I'm using the 32K XP model (sometimes also called the LA) introduced in 1987. There was a cheaper model with 8K RAM called the CM, and a 'deluxe' model called the LZ which was introduced in 1989 and had a 4-line display. Ooh, fancy! 1 x Psion Comms Link A remarkably hard-to-find Organiser peripheral. Vintage units from the 80s have an RS232 port, modern units have a ...
