The psychology of learning focuses on a range of topics related to how people learn and interact with their environments. One of the first thinkers to study how learning influences behavior was psychologist John B. Watson who suggested that all behaviors are a result of the learning process. The school of thought that emerged from Watson's work was known as behaviorism.

The Basics of the Psychology of Learning

The purpose of the psychology of motivation is to explain how and why that happens. Broad views of how to understand motivation were created by psychologists based on various types of analyses. Cognitive analyses, behavioral anticipation, and affective devices are often used to account for motivation in terms of expecting an end-state or goal.
