Decoro Design steel panel radiators are designed to be installed in closed hydronic heating systems, with a maximum operating temperature of 250 ° F. If the heating system contains antifreeze, the proper Ph must be maintained. High acidity will damage the radiator and void the manufacturer ' s warranty.

PANEL RADIATOR INSTALLATION MANUAL

TRV - Thermostatic Valves (also known as TRVs), are similar in design to manual valves with the key difference being that they feature a temperature sensor. Although the sensor might sound quite high-tech (unless you already have or looking to purchase an electronic version), TRVs typically feature a bit of wax or liquid that reacts to the surrounding air temperature and regulates the radiator ...
