selling author and strategist Ralph Peters confronts the crucial security issues of our time--and the troubled times to come.

In the precursor to his groundbreaking "Beyond Baghdad," strategist Peters assembles 18 essays, written both before and after the September 11 attacks.

Blood, according to Gil Anidjar, maps the singular history of Christianity. As a category for historical analysis, blood can be seen through its literal and metaphorical uses as determining, sometimes even defining Western culture, politics, and social practices and their wide-ranging incarnations in nationalism, capitalism, and law. Engaging with a variety of sources, Anidjar explores the presence and the absence, the making and unmaking of blood in philosophy and medicine, law and literature, and economic and political thought from ancient Greece to medieval Spain, from the Bible to Shakespeare and Melville. The prevalence of blood in the social, juridical, and political organization of the modern West signals that we do not live in a secular age into which religion could return. Flowing across multiple boundaries, infusing them with violent precepts that we must address, blood undoes the presumed oppositions between religion and politics, economy and theology, and kinship and race. It demonstrates that what we think of as modern is in fact imbued with Christianity. Christianity, Blood fiercely argues, must be reconsidered beyond the boundaries of religion alone.

Now available in paperback In the no-holds-barred tradition that has won him so many fans across the nation and around the world, best-selling author and strategist Ralph Peters confronts the crucial security issues of our time--and the troubled times to come. With his trademark clarity and force, Peters argues that we have left behind the Age of Ideologies to enter a violent period in which ethnicity and religion--blood and

faith--will continue to be the source of ferocious rebellions, genocide, and global terrorism. His compelling vision spares neither our foreign policy nor our domestic follies as he ruthlessly outlines what it will take to protect our country against this new breed of enemies. Russia is back as an aggressive imperialist power. We have forgotten what it takes to win wars, leading to tragic, unnecessary failures. Too many Americans still refuse to take our enemies seriously, even though terrorists and foreign leaders are bent on inflicting apocalyptic destruction on us. hose enemies will use nuclear weapons, if allowed to possess them. Religious wars are impossible to prevent--because our enemies desire them. The Middle East is headed for greater chaos, and Israel may not survive. Despite these challenges, the United States will remain the world's most successful and greatest power--but the cost will be determined by our willingness to face a new century's brutal realities. Wars of Blood and Faith continues the ever popular series of work by Ralph Peters on strategy, conflict, and the military published by Stackpole Books--titles that have not only excited and informed a wide range of readers, but have profoundly influenced our national security.

Drawing on his global experiences from Africa to Iraq, author Ralph Peters attacks today's crucial issues of our time head-on, with the clear eye and blunt voice that has won him a devoted following: Is Iraq worth it? What's the truth behind the politics? Are our defense dollars buying a strong military--or the wrong military? Are we missing great opportunities elsewhere while hypnotized by the Middle East? Must we accept that Islam itself is the problem? Will we face a war with China? What would such a war mean? Can Washington learn from its mistakes? These are just a few of the controversial issues Peters takes on in a series of body blows to the status quo. Famed as the most original strategist of our time, Ralph Peters builds on the critical and commercial success of previous books, Wars of Blood and Faith(978-0-8117-0274-4) and New Glory(1-59523-011-4), to offer a stunningly fresh vision for our military, our country, and the world.

Richard Bonney's illuminating and controversial new book takes as its subject the Christian/Muslim Clash of Civilizations thesis, which underpins contemporary US foreign policy. It gets beyond the stereotypes and demonstrates - through careful analysis of both sides of the debate - how the US response to 9/11 and the problematic interventions in Afghanistan and Iraq have suffered as a result of this neo-conservative influence on American foreign policy since 1945.

This book discusses the rapid erosion of social pluralism and the concomitant “ religious cleaning ” of religious minorities in the Middle East. It focuses on five crucial years between the “ Arab Spring ” uprisings of 2011 and the U.S. government ’ s genocide determination in 2016 regarding religious minorities in the Middle East.

When a beautiful and brilliant Army Lieutenant is found murdered at a post on the Mexican border, military and civilian investigators struggle with a long list of possible suspects and a long-standing breakdown in regional discipline.
