Raise the bar to become the best version of you Most of us set the bar too low in our lives, both personally and

professionally. Bob Deutsch, a cognitive neuroscientist/anthropologist turned entrepreneur, has spent a lifetime studying people and found that we choose not to pursue our greatest ambitions because we feel we are incapable of reaching them. But he has also found that we are each born with the fundamental abilities to live the full, creative, dynamic lives we dream about. Curiosity, Openness, Sensuality, Paradox, and Self-Story—these are our five inner resources. Through interviews with inspiring people, including Wynton Marsalis and Richard Feynman, and case studies of personalities like Bruce Springsteen and Anna Quindlen, Deutsch shows us how to access and use these resources to open our lives to unimagined possibilities.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-

by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.
