Rigor in Math 1

For a completely rigorous first account, I can recommend (based on my own experience from 1st and 2nd year undergrad) Friedberg–Insel–Spence's Introduction to Linear Algebra, though I seem to recall the account of determinants being a bit on the clumsy side. On the other hand, Axler's Linear Algebra Done Right has quite a good reputation.. Once you've learnt some linear algebra, though ...

quadratic equation. He has placed the following equation on the board: $y = ax^2 + bx + c$ and is modeling for the students how to solve the problem. The teacher begins the carefully planned lesson by walking his students through the steps used to solve the equation.

A Rigorous Inquiry-Based Math Program

Students in Algebra 2 continue their study of algebraic forms and functions, and learn to deploy key concepts from Algebra 1 on more difficult problems. We explore the rich field of polynomials, and study sequences and series. We also lay the groundwork for understanding optimization problems with a study of inequalities.
