For manual transmissions, this means simply putting the shifter out of gear. For four-wheel drives, use the secondary transmission setting (the one that changes it from 2 wheels to 4 wheels) into the neutral setting. Once the vehicle is in its neutral setting, put the key in the ignition and turn it to the ACC position.

Would an automatic or manual transmission be better suited for towing? There isn't a clear-cut winner in the towing transmission debate. Expert opinions generally tip the scales slightly in favor of the automatic, but drivers seem to prefer manuals. Whatever the individual inclinations, there are some pros and cons on both sides of the argument.
