Amid the Canary Islands lies the massive crater of the volcano Cumbre Vieja. Scientists theorize that one day the volcano will erupt, triggering a series of events that will lead to a tsunami higher than any in recorded history. This mega-tsunami, with waves of more than 150 feet in height, would ravage Europe, Africa, and ultimately the East Coast of the United States, causing immeasurable loss of life and destruction . . . After Professor Paul Landon, the world's most prominent geophysicist, is found with a bullet in his head, it is discovered that Ravi Rashood—America's nemesis and the former SAS officer who is now the head of Hamas—has hatched a diabolical plot against the West: to fire a nuclear-tipped guided cruise missile—Scimitar SL-2, named for the curved sword of the Muslim warrior Saladin—into Cumbre Vieja. United States Admiral Arnold Morgan, the retired National Security Adviser, and the Pentagon know it's not a joke when Rashood, accompanied once again by his wife, the Palestinian Shakira, explodes Mount St. Helens. Morgan knows something even more horrific is to come. But stopping them won't be easy. Rashood and his Hamas crew are deep in the ocean, in an undetectable sub, which he managed to procure from Russia via communist China. Perhaps worse, a new President, a weak-willed liberal in the White House, worries about taking a stand. As the terrorists' deadline approaches, the newly implemented and unseasoned National Security team must consider the unthinkable. They must assume the daunting task of organizing a mass relocation of major population centers along the East Coast to safer ground. Morgan once again finds himself at the center of a desperate cat-and-mouse chase, battling his greatest enemy yet as he races against time to locate the silent underwater marauder and stop Rashood before the unimaginable happens. With his trademark authentic research and grasp of military hardware, geopolitics, and cutting-edge science, Patrick Robinson is at the top of his game with this new tale.

The world's leading producer of oil is on the brink of revolution... A Crown Prince, enraged over the careless, destructive rule of the Saudi royal family, is determined to bring about its fall -- and secretly enlists the aid of a powerful Western ally. France, with its fleet of lethal Hunter Killer submarines, is willing to use whatever deadly force is necessary to shift the power structure of the world's oil giant for a guaranteed share of the wealth. Blind greed and duplicity have forged an unholy alliance -- between France's most able commander . . . and General Ravi Rashood, the Middle East's most virulent terrorist. The terrifying battle for a desert kingdom has begun, as the oil fields explode and the global economy is plunged into chaos. And former Security Advisor to the President, Admiral Arnold Morgan, must lead the offensive to expose the foulest treachery since World War II before America's worst nightmare becomes reality.

Armed with stolen U.S. military technology, the Chinese are producing a frightening new breed of weaponry, led by the ICBM submarine Xia III--a vessel that just might be able to launch a nuclear warhead across the Pacific Ocean and take out an American West Coast city. National Security Adviser Admiral Arnold Morgan can't let that happen, and he dispatches the most stealthy hunter-killer submarine in the U.S. fleet, the 9,000-ton ultrasecret Seawolf, deep into the dark, forbidden waters of the South China Sea. But then the unthinkable happens: Seawolf, collides with a Chinese destroyer and falls into enemy hands. A team of cunning Navy SEALs--the biggest Special Forces assault group assembled since Vietnam--is sent in to free the captive Seawolf, crew and bring them home. The American Eagle confronts the Chinese Dragon with the balance of world power on the line. Failure is not an option...

Überraschend bricht der Mount St. Helens aus und hinterlässt eine Spur der Verwüstung. Admiral Morgan, ehemaliger Sicherheitsberater im Weißen Haus, ist sofort alarmiert, denn nur eine von einem U-Boot abgefeuerte Cruise Missile vermag einen solchen unerwarteten Vulkanausbruch auszulösen. Kann eine Katastrophe noch verhindert werden?

The year is 2011. An oil-hungry world is starving and Argentina, with Russia's help, is determined to brutally wrest the petroleum-rich Falkland Islands from British hands. Enraged over this brazen act of international piracy, Great Britain dispatches a battle fleet to the islands for the second time in thirty years—unaware that Viper K-157, a lethal Russian Akula-class submarine, lies in wait, stuffed to the gunwales with ship-killing torpedoes. America cannot sit idle as hell explodes in the South Atlantic and, under the stern eye of Admiral Arnold Morgan, the military's most powerful weapon is unleashed to hammer Argentina into submission: the U.S. Navy SEALs. The outcome of the unforeseen war that's igniting in America's backyard ultimately depends upon her awesome "ghost force" and their successful execution of two remarkable clandestine missions—while the consequences of

failure may be too terrible to consider.

***** SILENT. UNDETECTABLE. READY TO LAUNCH. The Russian-built Kilo-Class submarine is the only true enemy of the American Carrier Battle Groups -- and it is up for sale. Having ordered ten, China primes its first three, ready to take control of the Taiwan Strait. Desperate to safeguard its ally on China's doorstep and stop the arrival of the Kilo-Class subs, America launches itself into a secret war, led by the President's National Security Advisor, Admiral Arnold Morgan. A battle over peace, power and money ensues, played out in the icy depths of the world's oceans and the hinterland of Russia's rivers and lakes. It soon becomes clear that there can only be one victor ...

It's as big as the Empire State Building, a massive floating fortress at the throbbing heart of a U.S. Navy Carrier Battle Group. Its supersonic aircraft can level entire cities at a stroke. Its surveillance gear can track every target within thousands of square miles--in the air, on the surface, and under the sea. Its crew of six thousand works night and day to keep this awesome military machine at peak performance. It's a Nimitz-Class nuclear carrier, the most powerful weapons system on the planet. Nothing can touch it. So when the first stunned messages say only that the Thomas Jefferson has disappeared, the Navy reacts with disbelief. But as her battered escorts report in, the truth becomes inescapable: a Nimitz-Class carrier has been claimed by nuclear catastrophe--the mightiest military unit on earth, vaporized without warning by an accidental detonation of unimaginable power. No other explanation is possible. But as Navy maverick Bill Baldrige begins to investigate the disaster that claimed his idolized brother's life, another chilling alternative begins to emerge from the high-tech web of fleeting sonar contacts and elusive radar blips. It points to a rogue submarine commanded by a world-class undersea warrior with the steely nerve and cunning of a master spy. Suddenly it's up to Bill Baldrige to track down this shadowy nuclear terrorist, who has already turned America's ultimate weapon into the biggest sitting duck in history--and who still has another nuclear-tipped torpedo in his tubes. He's already proved he has the icy ruthlessness to incinerate six thousand sailors without a qualm. What will he do for an encore? In these pages the modern military springs to life, from the Pentagon's tense conferences to the screaming flight deck of a giant carrier to the silent conning tower of an attack sub on full alert. But as Bill Baldrige races against time to pursue the nation's most deadly enemy, we are forced to ask ourselves serious real-life questions: Have defense budget cuts jeopardized our national security? Are we prepared to defend ourselves against naval terrorist? How safe are we? Nimitz Class is a world-class techno-thriller with a plot as riveting as Hunt for Red October--and an explosive twist out of tomorrow's headlines. Today it's a novel. Tomorrow it might be the news.
