~~Software Architecture And Design Illuminated Jones And ...~~
Software architecture refers to the fundamental structures of a software system and the discipline of creating such structures and systems. Each structure comprises software elements, relations among them, and properties of both elements and relations. The architecture of a software system is a metaphor, analogous to the architecture of a building. It functions as a blueprint for the system and the developing project, laying out the tasks necessary to be executed by the design teams. Software ar

~~Software Architecture And Design Illuminated Jones And ...~~
The software architecture focuses on the role of software components. Software components consist of a simple program module or an object oriented class in an architectural design. The architecture design extended and it consists of the database and the middleware that allows the configuration of a network of clients and servers.
