MIT - Massachusetts Institute of Technology

In the cheat sheet that I have created, the rows represent the different types of independent variables (also known as predictors or covariates), while the the columns represent the different types of dependent variables (also known as criteria or measures). The intersection of the rows and columns then informs the appropriate analysis to use, and the small text below each analysis shows the quick steps for executing the analysis in SPSS.

Demystifying Statistical Analysis 1: A Handy Cheat Sheet ...

t.test(x,mu=n, alternative = "less") One-tailed t-test that the mean of the numbers in vector x is less than n. t.test(x,y,mu=0, var.equal = TRUE, alternative = "two.sided") Two-tailed t-test that the mean of the numbers in vector x is different from the mean of the numbers in vector y. The variances in the two vectors are assumed to be equal.
