Steel Structures: Design and Behavior, 5/e strives to present in a logical manner the theoretical background needed for developing and explaining design requirements. Beginning with coverage of background material, including references to pertinent research, the development of specific formulas used in the AISC Specifications is followed by a generous number of design examples explaining in detail the process of selecting minimum weight members to satisfy given conditions.

I bought this as the required textbook for my graduate Steel Structures II class. While I didn't use the book a lot in class, I am still glad I have it, although it really isn't the go-to reference it could be. The 5th edition is very similar to the 4th edition, only it has been updated to follow the AISC 13th edition steel
