Introduction to Sights A sight is a device used to line up the muzzle with the shooter's eye so that he or she can hit the target. Sights are more critical on a firearm that fires a single projectile (rifle and handgun) than on a firearm that shoots a pattern of shot (shotgun).

Leifer's Study Guide for Introduction to Maternity and Pediatric Nursing is a rich resource that enhances your comprehension and application of material from every chapter of the textbook. With a variety of learning activities, critical thinking exercises, case studies, and review questions, this study guide reinforces your mastery of the essential maternity and pediatric nursing concepts

and skills you need to pass the NCLEX-PN® Examination and succeed in your nursing career. NCLEX exam-style multiple-choice review questions at the end of each chapter test basic chapter knowledge as well as ask for appropriate nursing actions, what the nurse should expect in terms of medical care of the patient, and what complications the patient is at risk of developing. Case Studies and Applying Knowledge activities provide additional opportunities to apply learned information to clinical care. Thinking Critically activities require you to apply what you've learned in the textbook to new situations and draw conclusions based on that knowledge. Learning activities include matching, labeling, and completion exercises to help you learn basic concepts of maternity and pediatric nursing. Crossword puzzles in selected chapters are a nice way to change up the

format when testing comprehension of terms and concepts. Answer key is located on the student's Evolve website. Several Thinking Critically sections and case studies with critical thinking questions have been added. Alternate-item format questions are included in the review questions for the NCLEX® Examination.

Reader-friendly and easy to use, the Study Guide for Introduction to Medical-Surgical Nursing, 6th Edition, is designed to help you master content and evaluate your progress through practical, useful exercises and activities, including a wealth of multiple-choice and alternate-format questions. This edition places an increased emphasis on higher-level application questions, including exercises to encourage practice in setting priorities, to prepare you to transfer your knowledge of medical-surgical concepts to patient care

in the clinical setting. Learning activities include matching (key term and vocabulary review), completion, listing, labeling (illustrations), ranking/ordering, and application questions for textbook nursing care plans. Approximately 2,000 review questions include revised as well as new standard multiple-choice and alternate-format questions. NCLEX review question answer rationales discuss both correct and incorrect responses to help you explore the logic of your choices. Prioritization activities provide practice in prioritizing (deciding what to do first) and assignment (giving specific tasks to health care providers who may be supervised by LPNs, including nurse aids and nurse assistants). NEW! Completely revised content matches the most up-to-date nursing diagnoses.
