The book is a comprehensive compilation of articles by experts in the field of suicide terrorism from across the world and across disciplines with a focus on suicide missions. It provides an insightful perspective on suicide terror as a phenomenon and as a process, and suggests psychosocial pathways for understanding the enigma that suicide terror poses. Understanding Suicide Terrorism delves upon the enigmatic issue of suicide terrorism. The book is an interdisciplinary multi-faceted venture that brings together scholarly work from across the world, across cultures and societies on the issue of suicide terror. The common thread weaving through all the articles is the notion of suicide terror as a complex phenomenon that defies easy explanation, prediction or controllability. Informed by theoretical stances of not only psychological sciences, but other social sciences like political science, criminology, military and sociology the book is an insightful reading.

Suicidal Behaviour: Assessment of People-At-Risk provides a psychometric analysis of various aspects associated with suicidal risk assessment to understand the suicidal personality and predict suicidal behaviour. It includes articles by experts in the field covering suicide research carried out globally. The collection is divided into two sections-the first focuses on the theoretical issues and the second on the applied and practical issues related to suicidal behaviour among specific populations. The main features of the articles include: - the diverse aspects of the problem in various socio-cultural contexts - prevention strategies, along with analyses of varied paradigms of suicidal behaviour, for the benefit of mental health practitioners and researchers - a focussed discussion on specific population - a comprehensive review of research in the field - reviews of suicide risk assessment tools The discussion begins with a contextualisation of the psychological factors implicated in the aetiology of suicidal behaviour with the help of a biopsychosocial model and is followed by an empirical analysis. The theoretical issues are then examined from various perspectives. This compilation will serve as a supplementary reader for students of psychology, psychiatry, psychiatric social work and counselling. It will also be useful for mental health professionals as well as those undertaking research on suicide.

Psychological resilience has emerged as a highly significant area of research and practice in recent years, finding applications with a broad range of different groups in many settings. Contemporary discourse is not limited to ways of effective coping with adversity but also introduces mechanisms that can lead to enhanced capacity after dealing with difficult circumstances and recognises the importance of enriching the field with varied perspectives. The Routledge International Handbook of Psychosocial Resilience is a comprehensive compendium of writings of international contributors that takes stock of the state-of-the-art in resilience theory, research and practice. The Routledge International Handbook of Psychosocial Resilience covers the many different trajectories that resilience research has taken in four parts. Part One delineates the ' Conceptual Arena ' by providing an overview of the current state of theory and research, exploring biological,

psychological, and socio-ecological perspectives and discussing various theoretical models of personal and social resilience. The ' Psychosocial Correlates ' of resilience are discussed further in Part Two, from personal and personality correlates, socio-environmental factors and the contextual and cultural conditions conducive to resilient behaviour. In Part Three, ' Applied Evidences ' are introduced in order to build upon the theoretical foundations in the form of several case studies drawn from varied contexts. Examples of resilient behaviour range from post-disaster scenarios to special operation groups, orphaned children, and violent extremism. Finally, Part Four, ' Proposed Implications and Resilience Building ' , sums up the issues involved in discussing post-traumatic growth, wellbeing and positive adaptation in the varied contexts of personal, familial, organizational and societal resilience. The volume provides a comprehensive overview of resilience theory, practice and research across disciplines and cultures, from varied perspectives and different populations. It will be a key reference for psychiatrists, psychologists, psychotherapists and psychiatric social workers in practice and in training as well as researchers and students of psychology, sociology, human development, family studies and disaster management.
