The key to success in life and business is to become a master at Conversational Intelligence. It's not about how smart you are, but how open you are to learn new and effective powerful conversational rituals that prime the brain for trust, partnership, and mutual success. Conversational Intelligence translates the wealth of new insights coming out of neuroscience from across the globe, and brings the science down to earth so people can understand and apply it in their everyday lives. Author Judith Glaser presents a framework for knowing what kind of conversations trigger the lower, more primitive brain; and what activates higher-level intelligences such as trust, integrity, empathy, and good judgment. Conversational Intelligence makes complex scientific material simple to understand and apply through a wealth of easy to use tools, examples, conversational rituals, and practices for all levels of an organization.

The Gulf Cooperation Council (GCC) countries are some of the richest and most dynamic emerging markets in the world. But they are tough markets! International companies must think seriously if they want to do business there – the barriers can be numerous and difficult. But the opportunities are phenomenal and rewarding. The key to success is to plan and take the right steps. This book shows how to do this by decoding, using case studies, and suggesting relevant solutions. For Judith Hornok, it ' s not about dry theories or mind games. Instead this book is based on numerous case studies drawn from the lives of well-known Arab and international business people. The reader can grasp the opportunities and avoid the pitfalls by knowing and understanding the Arab Business Code (ABC): "learning the A-B-Cs." This book offers a study with practical measures, a toolkit of easy-to-learn and simple-to-use techniques that pave the way for business success in the Gulf. Over fifteen years of research is boiled down into a clearly structured, compact book. Judith Hornok presents the insights of her studies by decoding the behavior of Arab business people in the Gulf using innovative techniques and new approaches, which can be easily implemented by the reader. For the first time Judith also presents her creations – the figures of The Seven Emotional Hinderers.
