The Decline of the Christian Consensus. By Ross Douthat. How the Right lost the culture wars. Culture. Heinrich Heine ' s Prophecy of Nazism. By Robert P. George.

Since the monumental architecture of the Zimbabwe Plateau first became known to Westerners in the 16th century, speculation about the people that created it has been continuous and inventive. Tales of strongholds in the interior were taken home by the first Portuguese chroniclers of the Swahili coast, and their narratives became part of the geographic lore of the 17th and 18th centuries. In the mid-19th century, the lore was spun into fantastic and mysterious yarns about long-lost riches that lured adventurers and traders. *Pikirayi* (history, U. of Zimbabwe) aims to set the record straight by examining the growth of precolonial states on the plateau and adjacent regions, with a focus on their historical and cultural development during the second millennium AD. c. writing history in Zimbabwe...The history of a nation-in-the-making should not be reduced to a selective heroic tradition, but should be a tolerant and continuing process of questioning and re-examination.' *Becoming Zimbabwe* tracks the idea of national belonging and citizenship and explores the nature of state rule, the changing contours of the political economy, and the regional and international dimensions of the country's history. In their Introduction, Brian Raftopoulos and Alois Mlambo enlarge on these themes and Gerald Mazarire's opening chapter sets the pre-colonial background. Sabelo Ndlovu tracks the history up to WWII and Alois Mlambo reviews developments in the settler economy and the emergence of nationalism leading to UDI in 1965. The politics and economics of the UDI period, and the subsequent war of liberation, are covered by Joseph Mtisi, Munyaradzi Nyakudya and Teresa Barnes. After independence in 1980, Zimbabwe enjoyed a period of buoyancy and hope. James Muzondidya's chapter details the transition 'from buoyancy to crisis', and Brian Raftopoulos concludes the book with an analysis of the decade-long crisis and the global political agreement which followed. '.. a profoundly new history of Zimbabwe that tears apart all of the old certainties...'

Indigenous societies around the world have been historically disparaged by European explorers, colonial officials and Christian missionaries. Nowhere was this more evident than in early descriptions of indigenous religions as savage, primitive, superstitious and fetishistic. Liberal intellectuals, both indigenous and colonial, reacted to this by claiming that, before indigenous peoples ever encountered Europeans, they all believed in a Supreme Being. *The Invention of God in Indigenous Societies* argues that, by alleging that God can be located at the core of pre-Christian cultures, this claim effectively invents a tradition which only makes sense theologically if God has never left himself without a witness. Examining a range of indigenous religions from North America, Africa and Australasia - the Shona of Zimbabwe, the "Rainbow Spirit Theology" in Australia, the Yupiit of Alaska, and the Māori of New Zealand – the book argues that the interests of indigenous societies are best served by carefully describing their religious beliefs and practices using historical and phenomenological methods – just as would be done in the study of any world religion.
