Modern culture's worship of "how-to" pragmatism has turned us into instruments of efficiency and commerce—but we're doing more and more about things that mean less and less. We constantly ask "how? and still struggle to find purpose and act on what matters. Instead of acting on what we know to be of importance, we wait for bosses to change, we seek the latest fad, we invest in one more degree. Asking how keeps us safe—instead of being led by our hearts into uncharted territory, we keep our heads down and stick to the rules. But we are gaining the world and losing our souls. Peter Block puts the "how-to" craze in perspective and presents a guide to the difficult and life-granting journey of bringing what we know is of personal value into an indifferent or even hostile corporate and cultural landscape. He raises our awareness of the trade-offs we've made in the name of practicality and expediency, and offers hope for a way of life in which we're motivated not by what "works," but by the things that truly matter in life—idealism, intimacy, depth and engagement.

"The Other Kingdom is about reframing how society views its communal identity. The book proposes to identify what has been considered sacred language and use it as an opening into the experience of community and the commons. It lays out a faith narrative without the negative traces of sectarianism. Readers are dared to imagine the human benefit of an alternative to the market ideology that defines our culture, called the Neighborly Covenant because it enlivens and humanizes the social order. The Other Kingdom proposes language for alternative ways to a covenantal culture, one that is active beyond election years and has different substance in defining society's communal identity"--

Ugh—meetings. They're where productivity goes to die, right? There has to be a better way. According to leading consultants Dick and Emily Axelrod, there is. Using the same principles that make video games so engaging and that transformed the numbing assembly line into the dynamic shop floor, the Axelrods outline a flexible and adaptable system used to run truly productive meetings in all kinds of organizations—meetings where people create concrete plans, accomplish tasks, build connections, and move projects forward. They show how to design every aspect of a meeting—from the way you greet people at the beginning to how you sum up at the end—so that real work actually gets done. Those who have adopted this system will never go back. Neither will you.
