The classic mixture that produces green gold is an alloy of pure yellow gold and pure silver -- though, for rings, harder metals such as nickel or zinc are sometimes added to make the gold more durable. 14K green gold would contain fourteen parts yellow gold and ten parts silver. 18K green gold would contain eighteen parts yellow gold and six parts silver.

This beautiful dark-green kitchen with gold accents shows how a mid-toned wood can act as the perfect companion material to this duo. The slim, light-wood shelves and raw-oak bar stools shown here are almost the same tone as the gold pendant lights and tap, but they bring an organic warmth and texture to the space, which tones down the Art Deco influence and brings in a modern-country feel ...

The Green - Sports Bar, Indoor Golf, Karaoke and Gaming

Electrum is a naturally occurring alloy of gold and silver, with trace amounts of copper and other metals. The ancient Greeks called it "gold" or "white gold", as opposed to "refined gold". Its colour ranges from pale to bright yellow, depending on the proportions of gold and silver. It has also been produced artificially, and is often known as "green gold". The gold content of naturally occurring electrum in modern Western Anatolia ranges from 70% to 90%, in contrast to the 45–55% of gold ...

Green to Gold is a program designed to allow qualified and inspired young enlisted soldiers to return to college, receive their baccalaureate degree, and earn a commission as an Army officer.

From the Publishers Weekly review: "Two experts from Yale tackle the business wake-up-call du jour—environmental responsibility—from every angle in this thorough, earnest guidebook: pragmatically, passionately, financially and historically. Though "no company the authors know of is on a truly long-term sustainable course," Esty and Winston label the forward-thinking, green-friendly (or at least green-acquainted) companies WaveMakers and set out to assess honestly their path toward environmental responsibility, and its impact on a company's bottom line, customers, suppliers and reputation. Following the evolution of business attitudes toward environmental concerns, Esty and Winston offer a series of fascinating plays by corporations such as Wal-Mart, GE and Chiquita (Banana), the bad guys who made good, and the good guys—watchdogs and industry associations, mostly-working behind the scenes. A vast number of topics huddle beneath the umbrella of threats to the earth, and many get a thorough analysis here: from global warming to electronic waste "take-back" legislation to subsidizing sustainable seafood. For the responsible business leader, this volume provides plenty of (organic) food for thought. "

In *The Green and the Gold*, his second historical novel, Christopher Peachment introduces us to Andrew Marvell, the beguiling 17th century poet and writer of "To His Coy Mistress", also a spy and politician. Marvell delightfully captured in his metaphysical poetry every aspect of love lost and gained. And yet, ironically, the man himself was a solitary figure whose reflections and tremendous insight allowed beauty to spill from an otherwise lonely existence. Peachment's Marvell allows us to witness those aspects of his life that we never would glean from history alone, as we follow him throughout his childhood, his travels in Europe, his firsthand experiences of the Cromwellian Civil War, and his endless battle between a deep-seated suspicion of women and a passionate yearning for them.

Apart from water, tea is more widely consumed than any other food or drink. Tens of billions of cups are drunk every day. How and why has tea conquered the world? Tea was the first global product. It altered life-styles, religions, etiquette and aesthetics. It raised nations and shattered empires. Economies were changed out of all recognition. Diseases were thwarted by the magical drink and cities founded on it. The industrial revolution was fuelled by tea, sealing the fate of the modern world. *Green Gold* is a remarkable detective story of how an East Himalayan camellia bush became the world's favourite drink. Discover how the tea plant came to be transplanted onto every continent and relive the stories of the men and women whose lives were transformed out of all recognition through contact with the deceptively innocuous green leaf.

"Implement the green strategies outlined in Dan Esty's and Andrew Winston's bestseller *Green to Gold*" Hard-nosed business advice for gaining competitive advantage through sustainability action in buildings and operations, information technology, product design, sourcing, manufacturing, logistics and transportation, marketing, accounting, and other key business functions Whether you are a climate change skeptic or an environmentalist, sustainability issues cannot be ignored in today's corporate world. With rising energy and natural resource costs, intensified regulations, investor pressures, and a growing demand for environmentally friendly products, sustainability is no longer an option—it's a business imperative. Unlike many green business books, the *Playbook* skips the environmental ideology and deals exclusively with tools and strategies that have been shown to cut costs, reduce risks, drive revenues, and build brand identity. Builds on Dan Esty and Andrew Winston's prizewinning *Green to Gold*, which has become a business classic and a staple of management training across the world. Shows in detail how each business function or department can achieve an eco-advantage over the competition Offers frameworks, checklists, and action plans applicable to any business—big or small, in manufacturing or services *The Green to Gold Business Playbook* gives you the tools to make green work—and work profitably—for your business.

Challenges the belief that environmentally safe practices are unprofitable

Ever wonder what it's like to interview famous athletes and coaches? For twenty years, sportscaster Jessie Garcia has done just that. In *My Life with the Green & Gold* she brings fans to the sidelines at Lambeau Field, inside the locker room, aboard the Packers bus, and into the host's chair at *The Mike McCarthy Show*. A self-proclaimed "terrible athlete" born without sports in her blood, Garcia reported on Wisconsin's beloved Green Bay Packers during the Holmgren, Rhodes, Sherman, and McCarthy years. She's been a Packers sideline reporter for preseason games and covered the team during their Super Bowl showdowns against the Patriots, Broncos, and Steelers. She's traveled with the team to Tokyo and the White House and to schools and retirement homes, where the gridiron heroes interacted with their fans. She's visited the hometowns of players and coaches, she's met their proud parents and their pets, she's interviewed the team trainer about their strength exercises. *My Life with the Green & Gold* also features up-close and personal stories about other teams and athletes she's covered, from the Badgers and Brewers to Wisconsin Olympians such as Bonnie Blair and Casey FitzRandolph. Garcia's expertise is capturing behind-the-scenes, human-interest stories. In *My Life with the Green & Gold*, she shares a personal and humorous insider's look at many Wisconsin sports heroes from the perspective of a female sports journalist who has ridden the adrenaline rush to be on the air at 5:00 a.m., 10:00 p.m., and any hour in between, while also juggling the many demands of family life. Not many parents can say they've changed their child's diaper in the tunnel at Lambeau, but Jessie Garcia can.

In 1850, young Scottish plant hunter John Jeffrey was despatched by an elite group of Victorian subscribers to seek highly prized exotic trees in North America. An early letter home told of a 1,200-mile transcontinental journey by small boat and on foot. Later, tantalising collections of seeds and plants arrived from British Columbia, Oregon and California, yet early promise soon withered. Four years after setting out, John Jeffrey, and his journals, disappeared without a trace. Was he lost to love, violence or the Gold Rush? *Green Gold* combines meticulous research with the fictional narrative of Jeffrey's lost journals, revealing an extraordinary adventure.

While the state of California remains one of the most striking and varied landscapes in the world, it has experienced monumental changes since European settlers first set foot there. The past two centuries have witnessed an ongoing struggle between environment and economy, nature and humanity that has left an indelible mark on the region. *Green Versus Gold* provides a compelling look at California's environmental history from its Native American past to conflicts and movements of recent decades. Acclaimed environmental historian Carolyn Merchant has brought together a vast storehouse of primary sources and interpretive essays to create a comprehensive picture of the history of ecological and human interactions in one of the nation's most diverse and resource-rich states. For each chapter, Merchant has selected original documents that give readers an eyewitness account of specific environments and periods, along with essays from leading historians, geographers, scientists, and other experts that provide context and analysis for the documents. In addition, she presents a list of further readings of both primary and secondary sources. Among other topics, chapters examine: California's natural environment and Native American lands the Spanish and Russian frontiers environmental impacts of the gold rush the transformation of forests and rangelands agriculture and irrigation cities and urban issues the rise of environmental science and contemporary environmental movement. Merchant's informed and well-chosen selections present a unique view of decades of environmental change and controversy. Historians, educators, environmentalists, writers, students, scientists, policy makers, and others will find the book an enlightening and important contribution to the debate over our nation's environmental history.

The family history of the Russells of Georgia is a saga of the Westward Movement during the middle fifty years of the nineteenth century. The "Russell boys," as prospectors and miners, moved with the frontier as it followed fresh discoveries of gold, from Georgia to California to Colorado. Then, after the interlude of the Civil War, they settled in the new territories, turning their abilities and ruggedness of character to the development of careers on other frontiers—ranching, farming, land development, medicine—in Montana, Colorado, and Texas. Elma Dill Russell Spencer, a descendant of one of these unusual brothers, relates their story as she learned it from family tradition transmitted by Grandma Russell, from family letters, from public documents, and from historical accounts of the exciting era. The reader of her narrative sees the evolution of Western society in the vast wasteland of mountain and prairie from the viewpoint of the people who were making history, people too engrossed in their own problems to realize the far-reaching significance of their achievement. The reader sees the struggle to wrest gold from the streams and hills with primitive tools and techniques; the development of tent villages into populous towns affording most of the comforts of the East; the evolution of a code of mining laws, of protection from violence and crime; the building of schools; the emergence of sectional problems and divided loyalties; the Civil War, mostly through noncombatants' eyes; the progressive changes in transportation, until the railroads tied the West to the East. The reader also encounters Indians, who ride in and out of these pages, and other fascinating types of characters associated with "the wild, varied, and always unpredictable" frontier. The odyssey of the Russell brothers as they struggle home to Georgia from Union-sympathizing Denver is particularly full of action, with tense moments in the account of narrowly escaped death—at the hands of Indians, through the ravages of disease, and from the enmity of Yankee foes. This book was originally published as *Gold Country* in 1958; the University of Texas Press edition was completely revised and first published in 1966.

The *Green and Gold Cookery Book* was first compiled in 1923 as a fundraising initiative of King's College (now King's Campus, Pembroke School, South Australia). In 1999 Pembroke School celebrated 25 years since its foundation and the 75th anniversary of King's College. This updated edition of the book is published in acknowledgement of those milestone events and comes with a hard cover and deckled edging.
