Vanessa Walker's Principles in Power explores the relationship between policy makers and nongovernment advocates in Latin America and the United States government in order to explain the rise of anti-interventionist human rights policies uniquely critical of U.S. power during the Cold War. Walker shows that the new human rights policies of the 1970s were based on a complex dynamic of domestic and foreign considerations that was rife with tensions between the seats of power in the United States and Latin America, and the growing activist movement that sought to reform them. By addressing the development of U.S. diplomacy and politics alongside that of activist networks, especially in Chile and Argentina, Walker shows that Latin America was central to the policy assumptions that shaped the Carter administration's foreign policy agenda. The coup that ousted the socialist president of Chile, Salvador Allende, sparked new human rights advocacy as a direct result of U.S. policies that supported authoritarian regimes in the name of Cold War security interests. From 1973 onward, the attention of Washington and capitals around the globe turned to Latin America as the testing ground for the viability of a new paradigm for U.S. power. This approach, oriented around human rights, required collaboration among activists and state officials in places as diverse as Buenos Aires, Santiago, and Washington, DC. Principles in Power tells the complicated story of the potentials and limits of partnership between government and nongovernment actors. Analyzing how different groups deployed human rights language to reform domestic and international power, Walker explores the multiple and often conflicting purposes of U.S. human rights policy.

How to Protect Your Leadership Influence and Power You ' ve worked hard to achieve your dreams and goals. Many others have done the same—only to lose it all in the end. Every day, we read about successful people in various walks of life who have lost their power and influence. They ' ve been fired, forced to resign, or shamed out of public life. They no longer have a market for their gifts, and they may even face criminal proceedings. These leaders have lost the trust of their companies, constituents, nations, followers, and families. Many were surprised to discover that their talents alone were not enough to prevent their downfall. Why did they fall in the end? Because they lacked the one quality that would have protected their leadership and given them enduring influence. Ironically, this quality is seldom taught to leaders today, either formally or informally. It is the quality of moral force, or character. Every human being is a leader over some domain as he or she exercises gifts and influence. That domain might be the halls of government, the boardroom, the classroom, the community, or the home. In The Power of Character in Leadership: How Values, Morals, Ethics, and Principles Affect Leaders, you will discover what character is, what it means to develop moral force, and how to preserve your leadership influence so that it is both effective and enduring.
