Be the Light takes readers to a magical place where secrets are revealed and questions answered – like “Why am I here?” “What is my purpose?” “How can I live an inspiring life?” Travel along to the Kingdom of the Light with Dr. Karen Campten who asks these age-old questions and uncovers glimpses of meaning in forgotten music, a light-filled bouquet of flowers, and the company of her oldest friends, her beloved cousin, and the grandchildren of the next generation. Liz Crisostomo offers a compelling and inspiring story where each seeker and reader will no doubt recognize something of themselves in Karen, Brian, Lola, Trevor, Shasha, their friends and family who are woven throughout her story. You will be moved by their strength and courage, stirred by their laughter, and become sympathetic to their pain and sadness. By getting to know the characters Liz has so lovingly created, you will begin to understand why you have the talents you have, where they’ve come from, and why you were blessed with these particular gifts.

With a Haynes manual, you can do it yourself...from simple maintenance to basic repairs. Haynes writes every book based on a complete teardown of the motorcycle. We learn the best ways to do a job and that makes it quicker, easier and cheaper for you. Our books have clear instructions and hundreds of photographs that show each step. Whether you're a beginner or a pro, you can save big with Haynes! -Step-by-step procedures -Easy-to-follow photos -Complete troubleshooting section -Valuable short cuts -Color spark plug diagnosis Complete coverage for your Piaggio Sfera, Typhoon, Zip, Fly, Skipper, Hexagon, Liberty, B125, X8/X9 Scooters for 1991-2009 and Vespa ET2, ET4, LX and GT Scooters for 1996-2009: -Routine Maintenance -Tune-up procedures -Engine, clutch and transmission repair -Cooling system -Fuel and exhaust -Emissions control -Ignition and electrical systems -Brakes, wheels and tires -Steering, suspension and final drive -Frame and bodywork -Wiring diagrams

This short paperback gives a wealth of information on small boats and their safe operation.

An authorised reissue of the long out of print classic textbook, Advanced Calculus by the late Dr Lynn Loomis and Dr Shlomo Sternberg both of Harvard University has been a revered but hard to find textbook for the advanced calculus course for decades. This book is based on an honors course in advanced calculus that the authors gave in the 1960's. The foundational material, presented in the unstarred sections of Chapters 1 through 11, was normally covered, but different applications of this basic material were stressed from year to year, and the book therefore contains more material than was covered in any one year. It can accordingly be used (with omissions) as a text for a year's course in advanced calculus, or as a text for a three-semester introduction to analysis. The prerequisites are a good grounding in the calculus of one variable from a mathematically rigorous point of view, together with some acquaintance with linear algebra. The reader should be familiar with limit and continuity type arguments and have a certain amount of mathematical sophistication. As possible introductory texts, we mention Differential and Integral Calculus by R Courant, Calculus by T Apostol, Calculus by M Spivak, and Pure Mathematics by G Hardy. The reader should also have some experience with partial derivatives. In overall plan the book divides roughly into a first half which develops the calculus (principally the differential calculus) in the setting of normed vector spaces, and a second half which deals with the calculus of differentiable manifolds.

With fuel costs and parking charges it's no wonder the consumer is looking for less expensive forms of travel. This book is aimed at the rider who wants to do his or her own basic scooter maintenance and servicing without the need for in-depth mechanical knowledge, or a technical manual. It covers areas such as oil, brakes, tyres, transmission, electrics, etc, allowing the owner to address the most regularly serviced items without forking out for additional costs. Illustrated with full colour photographs throughout, and featuring clear, easy-to-follow instructions, this book is a must-have for scooter users.

The latest ideas in machine analysis and design have led to a major revision of the field's leading handbook. New chapters cover ergonomics, safety, and computer-aided design, with revised information on numerical methods, belt devices, statistics, standards, and codes and regulations. Key features include: *new material on ergonomics, safety, and computer-aided design; *practical reference data that helps machines designers solve common problems--with a minimum of theory. *current CAS/CAM applications, other machine computational aids, and robotic applications in machine design. This definitive machine design handbook for product designers, project engineers, design engineers, and manufacturing engineers covers every aspect of machine construction and operations. Voluminous and heavily illustrated, it discusses standards, codes and regulations; wear; solid materials, seals; flywheels; power screws; threaded fasteners; springs; lubrication; gaskets; coupling; belt drive; gears; shafting; vibration and control; linkage; and corrosion.

If you're red-blooded and somewhere between 35 and 50 the chances are that your first bike was a sports moped. This book takes you on a nostalgic full throttle trip back to the heady days of the 1970s and early 80s when these fabulous little superbikes were available to 16 year-olds. Packed with photos from past and present, this book will revive wonderful memories of the machines, the people, the fashions, and even the music of the time. Includes coverage of AJW, Batavus, Casal, Cimatti, Derbi, Fantic, Flandria, Garelli, Gilera, Gitane, Honda, Kreidler, KTM, Malaguti, Motobecane, Negrini, NVT, Puch, Suzuki, Testi, Yamaha and Zundapp.
