Interviews - Edward Luttwak | The Crash | FRONTLINE | PBS

A new kind of capitalism is raging around the globe--and its economic and social consequences could be crippling. In Turbo-Capitalism, Edward Luttwak, a noted international strategist and consultant, warns that the free market has gone amok. He predicts possible massive increases in poverty, crime, and unemployment, especially in the Third World, which lacks the political and legal systems of the U.S.

In this incisive and controversial exposé of the hidden effects of today's free-market capitalism, Edward Luttwak describes in powerful detail how it vastly differs from the controlled capitalism that flourished from 1945 to the 1980s. Turbo-capitalism is private enterprise liberated from government regulation, unchecked by effective trade unions, unfettered by concerns for employees or communities, and unhindered by taxation or investment restrictions. The winners in this free-for-all are getting much richer, while the losers are becoming poorer and are forced by downsizing to take the traditional jobs of the underclass. Led by the United States, closely followed by Britain, turbo-capitalism is spreading fast throughout Europe, Asia, and the rest of the world without the two great forces that check its enormous power in the United States: a powerful Legal system and the stringent rules of American calvinism. Luttwak exposes the major societal upheavals and inequities turbo-capitalism causes and the broad dissatisfaction and anxiety that may result.

An analysis of today's accelerated capitalism and the social price we are likely to pay for it. It examines deregulation, privatization, technological change and globalization, making predictions related to jobs, family life, crime and the underclass.

In this incisive critical analysis of today's free market capitalism, Edward Luttwak shows how it is vastly different from the controlled capitalism that flourished so successfully from 1945 to the 1980s. Turbo-capitalism is private enterprise liberated from government regulation, unchecked by effective trade unions, unfettered by concerns for employees or investment restrictions, and unhindered by taxation. It promises a dynamic, expanding economy and new wealth. The winners--the architects and acrobats of techno-organizational change--become much richer; the losers, the majority, become relatively or absolutely poorer and are forced by downsizing to take the traditional jobs of the underclass, more and more of whom end up in prison. Edward Luttwak challenges the conventional wisdom that jobs lost in old industries will be replaced by jobs in new ones. If General Motors fires you, Microsoft will not hire you; instead you'll be working in 'services,' often poorly paid. Led by the

United States, closely followed by Britain, turbo-capitalism is spreading fast throughout Europe, Asia, and the rest of the world (only in France and Japan is there any resistance) without the two great forces that check its enormous power in the United States: a powerful legal system and the stringent rules of American Calvinism. Acknowledging the great efficiency of turbo-capitalism, Luttwak provides no solutions but describes in powerful detail the major societal upheavals and inequities it causes and the broad dissatisfaction and anxiety that may result. He suggests this is a high price to pay for this great dilemma of our times. "They call it the free market, but that is shorthand for much more than the freedom to buy and sell. What they celebrate, preach, and demand is private enterprise liberated from government regulation, unchecked by effective trade unions, unfettered by sentimental concerns over the fate of employees or communities, unrestrained by customs barriers or investment restrictions, and molested as little as possible by taxation. What they insistently demand is the privatization of state-owned businesses of all kind and the conversion of public institutions from universities and botanical gardens to prisons, from libraries and schools to old-age homes into private enterprises run for profit. What they promise is more dynamic economy that will generate new wealth--while saying nothing about the distribution of any wealth, old or new. They call it the free market, but I call it turbo-capitalism because it is so profoundly different from the strictly controlled capitalism that flourished from 1945 until the 1980s, and that brought the sensational novelty of mass affluence to the peoples of the United States, Western Europe, Japan, and all other countries that followed their paths." -- Edward Luttwak

One of America's most thoughtful and provocative strategists exposes the economic and cultural assumptions that have driven the U.S. to the brink of social and financial collapse. Edward Luttwak reveals a forceful new policy that can reverse America's decline.

As the rest of the world worries about what a future might look like under Chinese supremacy, Luttwak worries about China's own future prospects. Applying the logic of strategy for which he is well known, he argues that the world's second largest economy may be headed for a fall unless China's leaders check their military ambitions.

The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

INTERNATIONAL BESTSELLER "For anyone who wants to understand capitalism not as economists or politicians have pictured it but as it actually operates, this book will be invaluable."--Observer (UK) If you've wondered how we did not see the economic collapse coming, Ha-Joon Chang knows the answer: We didn't ask what they didn't tell us about capitalism. This is a lighthearted book with a serious purpose: to question the assumptions behind the dogma and sheer hype that the dominant school of neoliberal economists--the apostles of the freemarket--have spun since the Age of Reagan. Chang, the author of the international bestseller *Bad Samaritans*, is one of the world's most respected economists, a voice of sanity--and wit--in the tradition of John Kenneth Galbraith and Joseph Stiglitz. *23 Things They Don't Tell You About Capitalism* equips readers with an understanding of how global capitalism works--and doesn't. In his final chapter, "How to Rebuild the World," Chang offers a vision of how we can shape capitalism to humane ends, instead of becoming slaves of the market.

Since the 1980s, globalization and neoliberalism have brought about a comprehensive restructuring of everyone's lives. People are being 'disciplined' by neoliberal economic agendas, 'transformed' by communication and information technology changes, global commodity chains and networks, and in the Global South in particular, destroyed livelihoods, debilitating impoverishment, disease pandemics, among other disastrous disruptions, are also globalization's legacy. This collection of geographical treatments of such a complex set of processes unearths the contradictions in the impacts of globalization on peoples' lives. *Globalizations Contradictions* firstly introduces globalization in all its intricacy and contrariness, followed on by substantive coverage of globalization's dimensions. Other areas that are covered in depth are: globalization's macro-economic faces globalization's unruly spaces globalization's geo-political faces ecological globalization globalization's cultural challenges globalization from below fair globalization. *Globalizations Contradictions* is a critical examination of the continuing role of international and supra-national institutions and their involvement in the political economic management and determination of global restructuring. Deliberately, this collection raises questions, even as it offers geographical insights and thoughtful assessments of globalization's multifaceted 'faces and spaces.'

Half of this new, post-Cold War world is intent on building a better Lexus, on streamlining their societies and economies for the global marketplace, while the other half is locked in elemental

struggles over who owns which olive tree, which strip of land.

One of our most important public intellectuals reveals the hidden history of our current global crisis. How can we explain the origins of the great wave of paranoid hatreds that seem inescapable in our close-knit world - from American 'shooters' and ISIS to Trump, from a rise in vengeful nationalism across the world to racism and misogyny on social media? In *Age of Anger*, Pankaj Mishra answers our bewilderment by casting his gaze back to the eighteenth century, before leading us to the present. He shows that as the world became modern those who were unable to fulfil its promises - freedom, stability and prosperity - were increasingly susceptible to demagogues. The many who came late to this new world or were left, or pushed, behind, reacted in horrifyingly similar ways: intense hatred of invented enemies, attempts to re-create an imaginary golden age, and self-empowerment through spectacular violence. It was from among the ranks of the disaffected that the militants of the 19th century arose - angry young men who became cultural nationalists in Germany, messianic revolutionaries in Russia, bellicose chauvinists in Italy, and anarchist terrorists internationally. Today, just as then, the wider embrace of mass politics, technology, and the pursuit of wealth and individualism has cast many more billions adrift in a literally demoralized world, uprooted from tradition but still far from modernity - with the same terrible results. Making startling connections and comparisons, *Age of Anger* is a book of immense urgency and profound argument. It is a history of our present predicament unlike any other.
