KS2 Design and Technology - BBC Bitesize

A front-end developer takes the visual design of a website (whether they created that design or it was handed to them by a visual designer) and builds it in code. A front-end developer uses HTML for the structure of the site, CSS to dictate the visual styles and layout, and perhaps even some Javascript.

The Difference Between Web Design and Web Development

Web design encompasses many different skills and disciplines in the

Acces PDF Web Technology And Design By

production and maintenance of websites. The different areas of web design include web graphic design; user interface design; authoring, including standardised code and proprietary software; user experience design; and search engine optimization. Often many individuals will work in teams covering different aspects of the design process, although some designers will cover them all. The term "web design" is normally used to describ
