The cheese was listed as a gift from the Manchurian diplomat. Officer Li Gase dusted for fingerprints and found none on the table or doors. The maid claimed that they had been wiped clean earlier. The wheel of cheese was on a platform in the sitting room, and half of it had been eaten. Pictures were taken of the half eaten cheese and sent to the lab for further tests.

Lab—DNA Fingerprinting Who Ate the Cheese? Introduction: DNA isolation from blood, hair, skin cells, or other genetic evidence left at the scene of a crime can be compared with the DNA of a criminal suspect to determine guilt or innocence. This is due to the fact that every person has a different DNA sequence, except for identical twins. Scientists use a small number of sequences of DNA that ...
