This rickety old house can be very noisy. Clomp! Clomp! Clomp! Goes the old lady's walking stick. In the room above, the dog wonders if that noise is a knock at the door - woof! Woof! Woof! And that wakes up the ginger cat in the room above who thinks the dog is chasing her - meow! Meow! Meow! Then the frightened cat wakes up the baby in the room above - waaah! Waah! Waah! Follow the riotous noises on each floor of the creaky old house as each resident makes their own crazy din. This delightful rhyming text is ideal for sharing with young children, providing many opportunities for them to join in. Written by a first-time author and illustrated by a highly successful picture book artist, this is sure to be a winner with both young and old.

The third edition of Donald H. Boalch's *Makers of the Harpsichord and Clavichord, 1440-1840* is a complete revision of the second edition published in 1974. The volume is now divided into two parts. Part I contains biographical details of all known makers, including some 500 not listed previously, and updated entries for more than 400 makers appearing in the second edition. Enlarged (and in some cases extended) descriptions of more than 2,000 surviving instruments by the makers are consigned to Part II, and the whole is complemented by a number of tables, a geographical and chronological conspectus of makers, and a new Index of Technical Terms in seven languages by Dr Andreas H. Roth.

'Statistics for Business and Economics' prepares business students to think critically about reported data and to use appropriate statistical methods to make accurate and reasoned decisions.

Looks at the art of chess calculation, describing when a player should calculate, how to discover moves, and how much time to spend on critical moves.

Grandmaster Dejan Antic and International Master Branimir Maksimovic have written a book that will change the way chess players look at the French Defence, one of the most popular chess openings. Black players in a French Defence have sound options like undermining the White center or playing against a damaged pawn structure. Once you have really mastered the black side in the French, you possess such a powerful weapon that even strong players will think twice what to play against you. This is a complete and up-to-date book for players of all

levels, with brand-new concepts in topical modern lines such as the Steinitz, McCutcheon and Morozevich Variation. Antic and Maksimovic explain strategic concepts and methods of attack, and present numerous novelties and new tactical ideas in all French main lines. But they have also developed several sidelines into deadly surprise weapons. The conclusion is clear: Black is OK in the French!
